

Smallpox Training & Education Report: Catalogue of Training Products

By Content Area and Delivery Method

As of 03/24/2003

The following CDC training products were designed to provide the latest CDC science and guidance on smallpox-related issues. Training was delivered to key target audiences using a combination of distance learning technologies and traditional classroom-based instruction.

This report describes all the smallpox training products available in terms of content area and delivery method. **The total number of distinct training products produced as of March 24, 2003 is 34.** Note: Many products have been converted to multiple media formats, thus providing alternative delivery options for the learner. **The total number of available training products, including all modes of delivery, is 69.**

CDC Training Product Title		Content Area	Delivery Method (Media)						
			Satellite	Web	CD ROM	Phone	VHS	Classroom	*Print
1	CDC Smallpox Response Team Training (Nov. 2001)	Comprehensive -- covering all aspects of smallpox disease, vaccine, and response						x	
2	Smallpox: What Every Clinician Should Know (Dec. 2001)	Clinical features Diagnosis and treatment About the vaccine Adverse events Contraindications and screening Vaccine administration Response to vaccine Care of the vaccine site	x	x	x	x	x		
3	NIP National Provider Organizations Partnership Smallpox Workshop (Dec. 2001)	Comprehensive -- covering all aspects of smallpox disease, vaccine, and response						x	
4	Smallpox Response Team Training for State Public Health Official (Dec. 2002)	Comprehensive -- covering all aspects of smallpox disease, vaccine, and response						x
