

ADVANCED CLINICAL ASPECTS OF EMERGENCY PREPAREDNESS

**December 18, 2006
7:00 a.m. - 12:00 noon
Dana Auditorium, Maine Medical Center
Portland, Maine**

DESCRIPTION

This training is intended to provide hospital-based healthcare providers detailed clinical information to diagnose and treat illness and injury resulting from exposure to potential weapons of mass destruction. The training will cover differential diagnoses, treatment protocols and personal protection strategies for a range of biological, chemical, radiological, and blast exposures.
